

Gates and Cameras

The Timbercreek Property Owners Association has installed video cameras at each of the entry gates for security purposes. The video data is stored in a secure location for limited future recovery. Should there be an incident at any of the gates or if a property owner has an alleged crime the video data can be retrieved and reviewed by the proper authority.

Security gates have been installed at each entry point to Timbercreek Village. These gates have been updated to current technology and will allow entry by access codes for property owners and their guests. This update will also reduce the monthly operating cost significantly. The codes will be changed on a reoccurring basis in order to enhance our security. Windshield stickers may be purchased for your entry convenience. Should you have any questions refer to the gate committee.
